3in1 CITY

Funcnional treats for dogs

Characteristics:

3-in-1 treats have been specially developed for city dogs. The basic ingredients are chicken meat and rice, which are hypoallergenic. In collaboration with vets and leading breeders, the three most serious problems that the owners of city dogs have to deal with were determined. The treats present a solution to all three problems at once.

There is a problem with the smell of excrement, digestive problems, and problems with immunity in smog-polluted cities.

1. The treats contain extracts of Yucca Schidigera that help reduce the odour of excrement and help the body with overall detoxification.
2. Chicory root extract is a rich source of prebiotics (fructooligosaccharides), and it thus positively affects the functioning of the digestive system. Support for the immune system of city dogs is very important, as smog generally remains near ground level, where dogs move.
3. Organic selenium is a powerful antioxidant that protects cells against the damage caused by free radicals.

Composition:

dried poultry meat 23%, rice, poultry fat, poultry meat 22,5% in fresh, hydrolysed poultry proteins 4,5%, dried (sugar) beet pulp, dried fish meat, dried rabbit meat, salmon oil, apple pomace, hydrolysed poultry liver 0,9%, mono-sodium phosphate, brewery yeast, sodium chloride, chicory roots 0,18%, dried algae Schizochytrium limacinum, Yucca shidigera 0,09%.

Analytical constituents:

moisture 17%, crude protein 28 %, crude oils and fats 13,5 %, crude fibre 2 %, crude ash 8 %, calcium 1,8 %, phosphorus 1,2 %, moisture 17%.

Content of additives in 1 kg:

compounds of trace elements: iron 130 mg (supplemented with chelate of iron, n-hydrate amino acids and iron sulphate monohydrate), copper 21 mg (supplemented with chelate of copper, n-hydrate amino acids and copper sulphate pentahydrate), manganese 36 mg (supplemented with chelate of manganese, n-hydrate amino acids and manganese oxide), zinc 157 mg (supplemented with chelate of zinc, n-hydrate amino acids and zinc oxide), selenium 0.5 mg (supplemented with an organic form of selenium produced by Saccharomyces cerevisiae CNCM I-3060), iodine 3,2 mg (supplemented with calcium iodide anhydrous); *vitamins, pro-vitamins and chemically well-defined substances having similar effect:* vit. A 19,500 i.u., vit. D₃ 1,500 i.u., nicotinic acid 60 mg; *antioxidants, preservatives.*

Instructions for use and rationing:

serve as a reward during training or as a treat serve as a reward during training or as a treat.

3in1 SENSITIVE

Funcional treats for dogs

Characteristics:

3-in-1 treats have been specially developed for sensitive dogs. The basic ingredients are lamb meat and rice, which are hypoallergenic. In collaboration with vets and leading breeders, the three most serious problems that the owners of sensitive dogs have to deal with were determined. The treats present a solution to all three problems at once.

There is a problem with allergies to corn gluten, problems with cardiac arrhythmia, and digestive problems.

1. The treats do not contain corn gluten, which is the most common source of allergies.
2. The content of Omega-3 and 6 complex supports the proper functioning of the heart and of the entire vascular system. The complex also helps maintain a beautiful shiny coat and healthy skin.
3. Probiotics promote the growth of intestinal microflora, improve the overall condition of the dog, and support the immune system.

Composition:

dried lamb meat 18%, broken rice, dried poultry meat, poultry fat, lamb meat 27.5 % in fresh, hydrolysed poultry proteins, dried (sugar) beet pulp, parboiled rice, apple pomace, salmon oil 1,8%, hydrolysed poultry liver, mono-sodium phosphate, brewery yeast, sodium chloride, chicory roots 0,18%, Yucca shidigera.

Analytical constituents:

moisture 17%, crude protein 27 %, crude oils and fats 13,5 %, crude fibre 2 %, crude ash 9 %, calcium 1,8 %, phosphorus 1,2 %.

Content of additives in 1 kg:

compounds of trace elements: iron 130 mg (supplemented with chelate of iron, n-hydrate amino acids and iron sulphate monohydrate), copper 21 mg (supplemented with chelate of copper, n-hydrate amino acids and copper sulphate pentahydrate), manganese 36 mg (supplemented with chelate of manganese, n-hydrate amino acids and manganese oxide), zinc 157 mg (supplemented with chelate of zinc, n-hydrate amino acids and zinc oxide), selenium 0.5 mg (supplemented with an organic form of selenium produced by *Saccharomyces cerevisiae* CNCM I-3060), iodine 3 mg (supplemented with calcium iodide anhydrous); *vitamins, pro-vitamins and chemically well-defined substances having similar effect:* vit. A 19,500 i.u., vit. D₃ 1,500 i.u., nicotinic acid 60 mg; *antioxidants, preservatives.*

3in1 ACTIVE

Funcional treats for dogs

Characteristics:

3-in-1 treats have been specially developed for active dogs. The basic ingredients are rabbit meat and rice, which are hypoallergenic. In collaboration with vets and leading breeders, the three most serious problems that the owners of active dogs have to deal with were determined. The treats present a solution to all three problems at once.

There is a problem with muscle and cardiac stress, restlessness and unwillingness to learn, cell damage caused by free radicals and reduced immunity.

1. The treats contain L-carnitine, which promotes the use of fats for energy; the dog is therefore strong enough to run every day. L-carnitine also prevents heart disease.
2. A complex of fatty acids derived from salmon oil – DHA and EPA, which the body cannot produce itself. These fatty acids promote the proper functioning of the brain, the eyes, and the heart. The dog is focused and emotionally balanced.
3. Antioxidants have beneficial effects in that they reduce the activity of free radicals. This reduces the likelihood of developing cancer, tumours, cardiovascular diseases, and many other diseases.

Composition:

rabbit meat 32.5 % in fresh, dried poultry meat 26.6 %, rice 25 %, poultry fat, dried (sugar) beet pulp, hydrolysed poultry proteins, dried fish meat, salmon oil 1,8%, hydrolysed poultry liver, mono-sodium phosphate, brewery yeast, sodium chloride, chicory roots, dried algae Schizochytrium limacinum, Yucca shidigera.

Analytical constituents:

moisture 17%, crude protein 28 %, crude oils and fats 13,5 %, crude fibre 2 %, crude ash 8 %, calcium 1,8 %, phosphorus 1,2 %.

Content of additives in 1 kg:

compounds of trace elements: iron 130 mg (supplemented with chelate of iron, n-hydrate amino acids and iron sulphate monohydrate), copper 21 mg (supplemented with chelate of copper, n-hydrate amino acids and copper sulphate pentahydrate), manganese 36 mg (supplemented with chelate of manganese, n-hydrate amino acids and manganese oxide), zinc 157 mg (supplemented with chelate of zinc, n-hydrate amino acids and zinc oxide), selenium 0.5 mg (supplemented with an organic form of selenium produced by *Saccharomyces cerevisiae* CNCM I-3060), iodine 3 mg (supplemented with calcium iodide anhydrous); *vitamins, pro-vitamins and chemically well-defined substances having similar effect:* vit. A 19,500 i.u., vit. D₃ 1,500 i.u., vit. E (RRR alpha tocopherol) 280 mg, vit.C 160 mg, nicotinic acid 60 mg, L-Carnitine 500 mg; *antioxidants, preservatives.*

Instructions for use and rationing:

serve as a reward during training or as a treat serve as a reward during training or as a treat.

3in1 INDOOR

Funcional treats for cats

Characteristics:

3-in-1 treats have been specially developed for cats kept indoors. In collaboration with vets and leading breeders, the three most serious problems that the owners of indoor cats have to deal with were determined. The treats present a solution to all three problems at once.

There is a problem with the smell of excrement, a problem with digestion caused by hairballs, and kidney problems.

1. The treats contain extracts of Yucca Schidigera that help reduce the odour of excrement and help the body with overall detoxification.
2. An anti-hairball complex facilitates the elimination of hairballs from the digestive system.
3. The added salmon oil, with its omega-3 DHA and EPA content, contributes to a healthy cardiovascular system and proper functioning of the kidneys.

Composition:

poultry meat (dried poultry 33%, hydrolysed poultry liver 4%), broken rice, poultry fat, maize, dried (sugar) beet pulp (4,5 %), wheat bran (3,7 %), pressed apple pomace (3,5 %), fresh pork liver, dried fish meat, malt rootlets, insoluble fiber (cellulose and lignin 2 %), eggs, inactivated dried yeast genus *Saccharomyces cerevisiae* (1 %), wheat germ, brewers' yeast, linseed, salmon oil 1%, calcium carbonate, sodium chloride, potassium chloride fructo-oligosaccharides, mono-sodium phosphate, yucca 0,05%, natural antioxidant complex.

Analytical constituents:

crude protein 32 %, crude oils and fats 19 %, crude fibre 5.5 %, crude ash 7.5 %, calcium 1 %, phosphorus 0.8 %, sodium 0.3 %.

Content of additives in 1 kg:

compounds of trace elements: iron 215 mg (supplemented with chelate of iron and n-hydrate amino acids), copper 24 mg (supplemented with chelate of copper and n-hydrate amino acids), manganese 51 mg (supplemented with chelate of manganese and n-hydrate amino acids), zinc 150 mg (supplemented with chelate of zinc and n-hydrate amino acids), selenium 0.5 mg (supplemented with an organic form of selenium produced by *Saccharomyces cerevisiae* CNCM I-3060), iodine 2.6 mg (supplemented with calcium iodide anhydrous); *vitamins, provitamins and chemically defined substances with similar effects:* vit. A 21,000 i.u., vit. D₃ 1,300 i.u., nicotinic acid 140 mg, taurine 1400 mg, lecithin 1000mg; *antioxidants, preservatives.*

3in1 STERILIZED; Funcional treats for cats

Characteristics:

3-in-1 treats have been specially developed for sterilised cats. In collaboration with vets and leading breeders, the three most serious problems that the owners of sterilised cats have to deal with were determined. The treats present a solution to all three problems at once.

There is a problem with the teeth, putting on weight, and a problem with infections and immunity.

1. Healthy teeth are ensured by an effective antibacterial protection which acts against the formation of dental plaque. The shape of the treats has been specially designed to clean the teeth from all sides.
2. Sterilised cats have a tendency to obesity, and that is why the energy content of each treat is under 1 kcal, while maintaining maximum palatability.
3. Nucleotides help to protect the cat against infection, facilitate the regeneration of the liver and the intestinal mucosa, and support the immune system.

Composition:

poultry meat (dried poultry, hydrolysed poultry liver), broken rice, maize, dried fish meat, poultry fat, dried (sugar) beet pulp, fresh pork liver, wheat germ, pressed apple pomace, brewers' yeast, inactivated dried yeast genus *Saccharomyces cerevisiae* (1 %), eggs, linseed, salmon oil, calcium carbonate, sodium chloride, potassium chloride, fructo-oligosaccharides, mono-sodium phosphate, yucca, natural antioxidant complex.

Analytical constituents:

crude protein 35 %, crude oils and fats 12 %, crude fibre 3.5 %, crude ash 7.5 %, calcium 1.1 %, phosphorus 0.9 %, sodium 0.3 %, potassium, 0.6% magnesium, 0.12%, content of max. energy 2 kcal / 1 pellet.

Content of additives in 1 kg:

compounds of trace elements: iron 234 mg (supplemented with chelate of iron and n-hydrate amino acids), copper 25 mg (supplemented with chelate of copper and n-hydrate amino acids), manganese 52 mg (supplemented with chelate of manganese and n-hydrate amino acids), zinc 155 mg (supplemented with chelate of zinc and n-hydrate amino acids), selenium 0.5 mg (supplemented with an organic form of selenium produced by *Saccharomyces cerevisiae* CNCM I-3060), iodine 2.7 mg (supplemented with calcium iodide anhydrous); *vitamins vitamins, pro-vitamins and chemically well-defined substances having similar effect:* vit. A 21,000 i.u., vit. D₃ 1,300 i.u., vit. C 200 mg, nicotinic acid 140 mg, taurine 1400 mg; *antioxidants, preservatives.*

Instructions for use and rationing:

serve as a reward during training or as a treat serve as a reward during training or as a treat.
